1. Prepare the pot with composted substrate. Add the substrate gradually to avoid
 2. Transfer the substrate to the pot, do not compact it too much.
 3. Incorporate nutrients in regular administration.
 4. Calculate the volume of soil to be added to the pot, in a quantity of 1/3 of the substrate.

Precautions:
 Do not expose plants directly to excessive temperatures.
 Use an appropriate substrate as recommended by the manufacturer.

After using seedling pots: Follow the below steps after using the substrate:
 1. Separate the plants from the substrate and place it into a plastic bag.
 2. Add some good soil substrate.
 3. Place the pot in direct sunlight and keep the substrate.

Recommendations:
 It is recommended to plant the seeds during the summer months.
 For optimal growth, do not expose the plants to temperatures below 15°C.
